Art Unit: 1644

1. Claims 18-51 are pending.
2. Applicant's election with traverse of Group I, claims 18-23, 31, 33-40, 48 and 50-51 in the Paper received 10-24-3 is acknowledged. The traversal is on the ground(s) that according to MPEP 1850, since no lack of unity was found during the IPER, the claims should be examined together. This is not found persuasive because MPEP section 1893.03(d) provides Examiner guidance on lack of unity in 35 USC 371 applications. There is no requirement to subjugate the US examination process to the findings of the IPER.

The requirement is still deemed proper and is therefore made FINAL.

3. Claims 24-30, 32, 41-47 and 49 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the Paper received 10-24-03.

4. Claims 31 and 33-34, 48 and 50-51 provides for the use of antibodies to MMP's, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 31, 33-34, 48 and 50-51 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1644

6. Claims 18-23 and 35-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Torii et al.

Torii et al., teaches detecting MMPs in BAL from patients with ARDS in a single step sandwich enzyme immunoassay, where the levels of the MMPs are higher in patients with ARDS are higher than controls.

The claimed invention is anticipated by the prior art teachings.
